

ignio

Product Overview

AI.WorkloadManagement (Cheetah release)

Batch jobs and automated workloads are the backbone of many enterprise businesses. The sheer size and complexity of workloads required for day-to-day operations - often numbering in the hundreds of thousands - catch many operations teams by surprise. For many businesses, it is a necessary component to their daily success.

Businesses face two key challenges in managing batch systems:

Scale, diversity, and complexity:
Thousands of jobs, defined by complex precedence relationships across different business functions and schedulers.

Changing environment:
Different functions are performed on different days. As a result, the process graph keeps changing every day.

These challenges collectively lead to the following chain of implications:

Lack of end-to-end visibility

Difficult to predict outages

Difficult to assess the impact of change

Surprises and firefighting:
Reactive operations

People dependence

Why ignio™ AI.WorkloadManagement?

ignio AI.WorkloadManagement provides a closed-loop solution for proactive and autonomous workload management. It combines the power of machine learning, AI, and automation to deliver predictable, agile, and silent batch operations.

Key Product Features

Learns context

Predicts future batch
in real time

Resolves issues intelligently
and autonomously

Highlights areas that
need attention

Generates just the right alerts
at the right time

Key Benefits

Makes your workload operations predictable, agile, and silent

Predictable

By providing ahead-of-time visibility into workload operations and their potential business impact

Agile

By reducing time to plan a change and time to resolve issues

Silent

By reducing alert noise and resolving large volume of operations issues without any manual touch

"ignio AI.WorkloadManagement is also available as a scalable, cloud-hosted software-as-a-service(SaaS) with a subscription-based payment model. Get your SaaS instance up and running in just 1-2 days. Benefits range from low up-front costs, no worries about applying patches and installing latest upgrades. 99.9% service availability, encrypted data stores and anytime, anywhere accessibility"
